

# Staffordshire Fire and Rescue Service

preventing • protecting • responding

FOI reference 123/17

Date Received 09 December 2017

## Request:

Under the freedom of information please can you provide me with the following data. All data is for the past 12 months (1st December 2016 to 30th November 2017). For points 1 – 5 i would like a list of incidents including time of call, time appliance mobile to incident, time appliance arrived in attendance at incident for all appliances that were mobilised to each incident (including over the border appliances).

1. Incidents where Staffordshire FRS has gone over the border into Cheshire FRS.
2. Incidents where Cheshire FRS has gone over the border into Staffordshire FRS.
3. Incidents on the A500, north and southbound, between M6 Junction 16 and Tunstall Junction.
4. Incidents between Junction 16 and Junction 15 of the M6 southbound.
5. Incidents within Audley, Talke and Kidsgrove.

In addition to the above, can you tell me if over the border appliances (Cheshire appliances) are prosed for incidents in the Staffordshire FRS area in the initial pre-determined attendance.

Also what is the delay time added to over the border appliances to estimate their time to the incident.

## Response:

Question 1:5 incl. please see attached spread sheet

Staffordshires wholetime resources, this is 120 seconds if they are on home station and 30 seconds if they are mobile and available, plus route time to incident as calculated by Vision.

In relation to other neighbouring authorities, the delay time added is for the station location not individual resources. If the station is predominantly wholetime, the delay set is 240 seconds which is the standard 120 seconds plus 120 seconds for the call to be passed to the OB Control. If the station is predominantly retained the delay set is 420 seconds which is the standard 300 seconds for a retained appliance plus 120 seconds for the call to the OB Control. This is in addition to the route time calculated by Vision from the station location.

1. Incidents where Staffordshire FRS has gone over the border into Cheshire FRS.

would be required also; ward names added to information

In addition to the above, can you tell me if over the border appliances (Cheshire appliances) are proposed for  
Also what is the delay time added to over the border appliances to estimate their time to the incident.

r incidents in the Staffordshire FRS area in the initial pre-determined attendance.

Yes

To be answered by control
